

Guide for bottles customization by serigraphy

Bottles customization by serigraphy

With this guide, we intend to show you all the possibilities offered by our serigraphy bottles customization system, so that you can order easily and conveniently.

In which cases we recommend serigraphy to customize bottles?

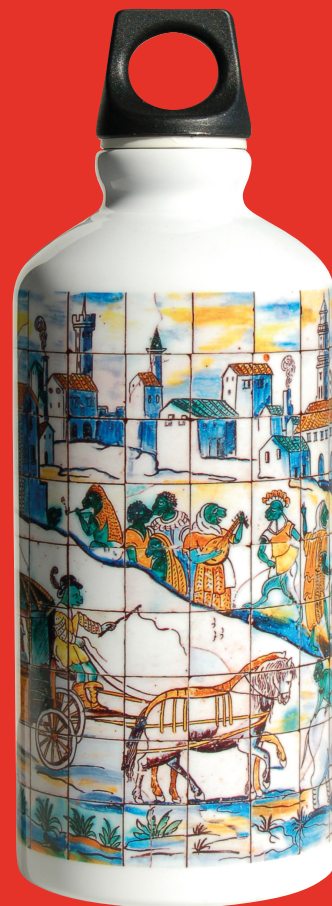

- 1 When it is a simple design with just a few colors
- 2 When you want to choose any bottle model, of any color

That's why it is the most used system by those who prioritize the type of bottle they want to customize, as they have our entire catalog at their disposal.

In which cases we do NOT use serigraphy to customize bottles?

- 1 When the design contains photographs, many color, gradients or patterns
- 2 When the order is less than 500 bottles (which is the minimum quantity)

If you'd like to customize less than 500 bottles, or if your design has some of the mentioned features, the solution is to use our sublimation customization system.

Please, download the brochure or contact our Customer Service for more information.
